Bicycle Stolen from Unlocked Garage Overnight

Occurred on Hesketh between Magnolia and Cedar

On Wednesday morning (March 6, 2019), a resident of the unit block of Hesketh Street noticed that his garage doors were wide open; they were closed but unlocked the previous evening when he had gone to bed.

Upon inspection, the resident noticed that his mountain bike was missing from inside the garage. The resident hadn't heard or seen anything suspicious overnight. Village officers canvassed the neighborhood, and none of the neighbors had seen or heard anything, either.

Residents are reminded to lock all exterior doors and windows, and to remove garage door openers from their cars when the vehicles are not parked inside the garage. Residents are also encouraged to leave front and rear porch lights on all night long, and to consider adding exterior security cameras to their alarm systems.
